

Reduced-sugar Blueberry refresher

IDEA	SOLUTION
Add a bright point to the day with a refreshing beverage full of fresh appeal and sweet delight — with simple, recognizable ingredients and less sugar	Combine blueberry pressed NFC (not from concentrate) juice with a cost-optimized stevia sweetener system for a 35% reduction in sugar

Blueberry pressed NFC juice is ideal for developing flavorful beverages with a simple, consumer-recognizable ingredient. When juices are pressed, the exposure to heat is reduced compared to traditional extraction methods. Pressed juices are pasteurized for food safety and kept unfiltered to maintain the solids captured during the pressing step. The higher turbidity of the pressed juice enables formulators to create a drinking experience closer to that of homemade juices.

ENLITEN® Fusion 9200 stevia sweetener starts from the leaf of the stevia plant and has a target sweetness equivalence of 8 to 10 SE. The best attributes of various steviol glycosides are combined for targeted delivery of a clean, sugar-like taste at an optimized cost point.

INGREDIENTS	PERCENTAGE (% AS IS)
Blueberry pressed NFC juice cloudy	61.70
Water	37.60
Lemon NFC Juice	0.66
ENLITEN® Fusion 9200 stevia sweetener	0.04
TOTAL	100.00

Preparation

1. Combine the blueberry pressed NFC juice, lemon juice and water.
2. Add ENLITEN Fusion 9200 stevia sweetener and stir.
